

DOCTORS AS ANIMAL LOVERS

Pages with reference to book, From 47 To 47

Doctors have always been animal lovers. Since ages they found resemblance in normal parts and abnormal lesions of human beings with various animals. Few examples are collected here. May be, after reading them you would like to improve them, or if you have a black Dog you can call him melanoma(Malignant Melanoma if it is ferocious looking) or if you own a Cat why not call it fibroma instead of kitty.
